SUMMARY

Final-year Computer Science student and full-stack developer with hands-on experience building AI-powered applications, scalable web platforms, and automation tools. Proficient in React, FastAPI, Python, and modern AI/ML stacks. Proven track record through internships, hackathon wins, production-grade projects, and a published research paper.

WORK EXPERIENCE

Software Developer Intern | Taashee Linux Services Oct 2024 – Jan 2025

- Built a custom Content Management System (CMS) using the Alfresco API, enabling file, user, and group management for enterprise clients.
- Implemented JWT-based user authentication and role-based access control (RBAC) using Alfresco's People & Groups API.
- Developed a full User Management module (create, edit, disable, search) and a Group Management System with user-group mapping.
- Integrated React (frontend), Express.js (middleware), and PostgreSQL (backend) into a clean, modular, component-based architecture for scalability.

RESEARCH PUBLICATION

FinSmartAI: Intelligent Financial Guidance Simplified

International Journal of Engineering Sciences and Advanced Technology (IJESAT) | Vol. 26, No. 4-1 (2026), Pages 367–375 | ISSN: 2250-3676
Published: April 2026 | https://ijesat.com/archivesa_view.php?pid=2653

PROJECTS

FinSmart AI — Personal Finance & Market Intelligence Platform — [GitHub] — React 19, FastAPI, Nvidia LLaMA 3.3 70B, CrewAI, LangChain, AstraDB, RAG

- Built a full-stack financial assistant combining AI-driven market sentiment analysis, a personal budget planner, and a CrewAI-powered stock analyzer.
- Implemented a RAG-based chatbot using LangChain, HuggingFace embeddings, and DataStax AstraDB for context-aware financial Q&A over uploaded documents.
- Orchestrated multi-agent workflows (Financial Analyst, Research Analyst, Investment Advisor) using CrewAI with yfinance and SerpAPI data sources.
- Designed a premium React frontend with dark-mode glassmorphism UI, Chart.js visualizations, and a real-time Fear-Greed Index gauge.

Fake Image Detector — Python, ResNet-50, FastAPI, PyTorch, Torchvision

- Developed a deep learning image classification system using fine-tuned ResNet-50 to detect AI-generated or manipulated images with high accuracy.
- Exposed the model via a FastAPI REST endpoint with Torchvision preprocessing for real-time inference.

Prompt Architect — React, GPT/Qwen API, REST

- Built a web platform for designing, optimizing, and versioning production-ready AI prompts with modular structuring and a template library.
- Integrated GPT and Qwen models for real-time prompt testing and AI-generated optimization recommendations.

EDUCATION

B.Tech, Computer Science Engineering | Matrusri Engineering College 2022 – 2026 | GPA: 8.9 / 10

Class XII: 96% | Class X: 10 CGPA

TECHNICAL SKILLS

Frontend	React.js, HTML5, CSS3, Bootstrap, JavaScript (ES6+), Chart.js, Vite
Backend	Python, Java, C++, FastAPI, Node.js, Express.js, REST APIs
AI / ML	PyTorch, LangChain, CrewAI, HuggingFace, RAG, ResNet-50, Nvidia LLaMA

Databases	PostgreSQL, MongoDB, MySQL, DataStax AstraDB (Vector DB)
Tools	Git, AWS, Docker (basic), Postman, VS Code
CS Fundamentals	Data Structures & Algorithms, OOP, System Design basics

ACHIEVEMENTS & CERTIFICATIONS

- **Reliance Undergraduate Scholar (2022–2026)** — Awarded for academic excellence and outstanding performance in academics and extracurricular activities.
- **Smart MECS Hackathon — 3rd Place** (out of 70 teams): Led a team to build a Job Employment & Skills Learning App using the MERN Stack.
- **Industry Ready Certification in Full-Stack Development** — NXTWAVE (2022–2026)
- **React.js Course Completion Certificate** — NXTWAVE
- **Introduction to Databases** — NXTWAVE
