VARKUTI SAKETH REDDY

AI/ML Engineer · Trainee Software Engineer

saketh1045@gmail.com • +91 75693 68481 • Hyderabad, India • LinkedIn • GitHub

PROFESSIONAL SUMMARY

AI/ML Engineer and Trainee Software Engineer at Solix Softech (Enterprise AI division), building RAG pipelines, MLflow-based ML lifecycle systems, and enterprise AI solutions using Python, FastAPI, ChromaDB, and Kubernetes. Previously built FinSmart AI — a production-grade multi-agent GenAI finance platform — and published a peer-reviewed research paper in IJESAT (2026). Reliance Undergraduate Scholar with internship experience in full-stack development and a 3rd-place hackathon finish out of 70 teams.

WORK EXPERIENCE

AI/ML Engineer · Trainee Software Engineer | Solix Softech Pvt. Ltd. *Jul 2026 – Present*

Hyderabad, India · On-site · Enterprise AI (EAI) Division

- Building a multi-format RAG system handling PDFs, images, Excel and Word documents using Python, FastAPI, ChromaDB, Ollama, and sentence-transformers for enterprise document intelligence.
- Implementing document parsing pipeline with PyMuPDF, python-docx, pandas, and pytesseract (OCR) to normalize 100+ mixed documents across two data buckets with metadata-based ChromaDB filtering.
- Developing REST API endpoints (/ingest, /query, /retrieve, /health) tested via Postman, with local LLM inference through Ollama for fully offline enterprise AI querying.
- Currently building an internal MLflow-based ML lifecycle management platform from scratch — covering experiment tracking, model registry, and model serving pipeline for enterprise ML workflows.
- Researched and implemented security mechanisms for prediction endpoints when deploying ML models on KServe within a Kubernetes cluster, including authentication, authorization, and secure inference routing.

Full Stack Developer Intern | Taashee Linux Services *Oct 2024 – Jan 2025*

Hyderabad, India · Hybrid

- Built a custom Content Management System using the Alfresco API, enabling file, user, and group management for enterprise clients.
- Implemented JWT-based authentication and role-based access control (RBAC) using Alfresco's People & Groups API, securing access across multiple user roles.
- Developed a full User Management module (create, edit, disable, search) and Group Management system with user-group mapping, integrating React, Express.js, and PostgreSQL into a clean modular architecture.

RESEARCH PUBLICATION

FinSmartAI: Intelligent Financial Guidance Simplified

International Journal of Engineering Sciences and Advanced Technology (IJESAT) | *Vol. 26, No. 4-1 (2026), Pages 367–375* | *ISSN: 2250-3676* | *Published: April 2026* | View Paper

PROJECTS

FinSmart AI — Full-Stack GenAI Financial Assistant [GitHub]

React 19 · FastAPI · Nvidia LLaMA 3.3 70B · CrewAI · LangChain · AstraDB · RAG · HuggingFace

- Built a production-grade AI finance platform integrating market sentiment analysis, personal budget planning, and a 3-agent CrewAI stock analyzer (Financial Analyst, Research Analyst, Investment Advisor) pulling live data from yfinance and SerpAPI.
- Engineered a RAG-based document Q&A chatbot using LangChain, HuggingFace embeddings, and DataStax AstraDB vector database, enabling context-aware financial queries over uploaded documents in under 2 seconds.
- Designed a dark-mode glassmorphism React frontend with Chart.js visualizations and real-time Fear-Greed Index gauge; deployed on Vercel and Render with 99% uptime.

- Co-authored findings as a peer-reviewed paper published in IJESAT (Vol. 26, No. 4-1, 2026) — the project served as both a production application and a published research contribution.

TECHNICAL SKILLS

AI / ML	LangChain, CrewAI, RAG Pipelines, ChromaDB, Ollama, HuggingFace, PyTorch, ResNet-50, Sentence Transformers, Nvidia LLaMA 3.3 70B, Prompt Engineering, Multi-Agent Systems
MLOps	MLflow, KServe, Kubernetes, Model Registry, Experiment Tracking, ML Pipeline Orchestration, Secure Model Serving
Backend	Python, FastAPI, Node.js, Express.js, REST APIs, JWT Auth, RBAC, Java, C++
Frontend	React.js, JavaScript (ES6+), HTML5, CSS3, Chart.js, Bootstrap, Vite
Databases	PostgreSQL, MongoDB, MySQL, DataStax AstraDB (Vector DB), ChromaDB
Tools	Git, Postman, Docker, VS Code, PyMuPDF, pytesseract, pandas, openpyxl
CS Core	Data Structures & Algorithms, OOP, System Design Basics, Quantum Computing Fundamentals

EDUCATION

B.Tech, Computer Science Engineering (AI/ML) | Matrusri Engineering College, Hyderabad *2022 – 2026*

GPA: 8.9 / 10 | Class XII: 96% | Class X: 10 CGPA

ACHIEVEMENTS & CERTIFICATIONS

- Reliance Undergraduate Scholar (2022–2026) — awarded for sustained academic excellence and extracurricular performance.
- Smart MECS Hackathon — 3rd place out of 70 teams; led a team building a Job Employment & Skills Learning App on the MERN stack.
- Quantum Computing For Everyone — An Introduction — Fractal Analytics / Coursera (2026)
- Introduction to Deep Learning — NxtWave
- Industry Ready Certification in Full-Stack Development — NxtWave (2022–2026)
- React.js Course Completion Certificate — NxtWave
- Introduction to Databases — NxtWave
